CarStop002

R995.65 excl. vat

- Manufactured from recycled rubber. Bonded with a polymeric binder and heat to create a solid product.
- Car stoppers are manufactured in a 550mm or 1800mm size.
- They can be painted in a variety of colours or a reflective material affixed.
- The stoppers have drainage channels along the length.
- We have 3 bolting points along a 1800mm length, or they can be epoxied down.
- Office parks, car parks, shopping centres, commercial facilities and other parking delineation, to name just a few.
- Car stoppers are the perfect investment that can assist in the prevention of accidental damage to pedestrians, vehicles, parking canopies and buildings.

Made from post-consumer recycled tyres. Driving sustainability, circularity and adding to your ESG scorecard and goals.

Fixing Bolts sold separately
Installation quote available on request
